📍 Depok, West Java, Indonesia

Fresh graduate in Information Systems with a focus on data analytics, business intelligence, and machine learning. Experienced in application development, data processing, dashboard visualization, and predictive model development using Python, SQL, and Tableau. Skilled in analyzing data to generate insights that support data-driven decision-making. Strong analytical, problem-solving, and team collaboration skills.

EDUCATION

Bachelor of Information Systems

Universitas Nasional - South Jakarta, Indonesia

September 2022 - May 2026

GPA: 3.88 / 4.00

EXPERIENCE

Web Developer Intern

Dinas Cipta Karya, Tata Ruang dan Pertanahan DKI Jakarta - Central Jakarta, Indonesia

April - June 2025

- Collaborated with the development team using the internal project management application PROMAN for backlog management, task tracking, and development coordination
- Developed and enhanced features for asset and meeting room management systems using Laravel
- Improved data accessibility by implementing search functionality to optimize information retrieval
- Enhanced user experience by implementing image preview features within the system
- Managed feature updates and code integration using GitLab for version control and team collaboration

PROJECTS

Furniture Sales Analytics Dashboard

Course: Bootcamp KarirNex

May 2026

- Developed an interactive dashboard using Looker Studio to monitor furniture sales performance and business KPIs in 2025
- Implemented dynamic filters by category, city, product, order status, and sales period to support interactive data exploration
- Analyzed sales trends, product category performance, and top revenue-generating cities to generate data-driven business insights

Academic Performance Monitoring Dashboard

Course: Final Project

December 2025 - February 2026

- Developed a student academic performance classification system using Random Forest and XGBoost to predict GPA categories
- Built an interactive Streamlit dashboard for academic data visualization and student performance monitoring
- Analyzed factors affecting GPA to support data-driven academic evaluation and decision-making

Business Data Analytics and Visualization Dashboard

Course: Business Intelligence

April - July 2025

- Developed an interactive Tableau dashboard to analyze business performance and visualize structured data
- Performed data cleaning and transformation to improve data quality and consistency
- Generated data-driven insights through KPI and business trend analysis

Grocery Store Management Application

Course: Object-Oriented Programming

May - July 2024

- Developed a desktop application using Java Swing and MySQL for transaction and inventory management
- Implemented CRUD functionality for inventory and sales transaction management
- Applied object-oriented programming principles to improve code structure and maintainability

CERTIFICATIONS

Data Analytics - BNSP Certification (2026 – 2029)

Data Analytics - Certiport Certification (2025 – 2030)

Google Cloud Computing Foundations - Google Cloud (2025)

SKILLS

Technical Skills: Python, SQL/MySQL, Tableau, Looker Studio, Excel, Data Analysis, Data Cleaning

Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Technical Communication, Team Collaboration
